

NOC Vision

Designed to accommodate the needs of the Network Operations Center – a true 24/7 Console Solution

Efficiency

NOC Vision helps consolidate peripherals for a multitude of technology-intensive applications. The product provides open, well-organized use of vertical space.

Flexibility

NOC Vision's modular design can be customized to suit specific needs and quickly and easily reconfigured.

Security

Numerous security features control physical access to equipment and reduce exposure to incidental equipment damage. The SMC lifetime warranty protects your investment.

Aesthetics along with Function

NOC Vision was designed to insure that where ever it gets installed it creates a showplace. Small footprint optimizes space to increase monitors per user and users to space.

There are numerous ways the product can be applied to the function of the user; from Flat Panels to CRTs the NOC Vision was designed to accommodate all kinds of equipment and technologies.

Improved ergonomics, ventilation and acoustics reduce operator stress and fatigue. Cable management features reduce troubleshooting time.

Superior Structural Performance

Fabricated from heavy gauge steel, NOC Vision is ruggedly designed for strength and rigidity while maintaining complete modularity,

Innovative Features and Options

NOC Vision has many options and appearance treatments to insure that the console will be totally functional but unique to the room that it will be installed.

Built around a portal frame (constructed from 14 Ga. Steel) the NOC Vision offers various storage solutions to variations of the frame structure to support two tiers of monitors to a single high all base console.

SMC's engineering department, with over 50 years of industry experience in the Command-and-Control Infrastructure, will furnish you with responsive and cost effective solution for your Console needs.
